PROFILE SUMMARY:

Product professional specializing in AI-driven product development and integration within global SaaS ecosystems. Experienced in defining product vision, managing cross-functional teams, and launching features powered by Generative AI, LLMs, and intelligent automation. Skilled in turning complex business requirements into scalable, data-backed solutions that drive adoption, engagement, and revenue.

CORE SKILLS & TOOLS:

Product Strategy • Product Lifecycle • Product Prototyping • Wireframing • PRD/BRD • Agile • Stakeholder Alignment • API Management • AI Integration • Agentic AI • Prompt Engineering • Vibe Coding • LangChain • JIRA • Confluence • Miro • Google Analytics • Power BI • Python • SQL

EXPERIENCE:

- VANTAGE CIRCLE | Associate Product Manager (Official Title: Project Coordinator) Nov 2024 – Present 📍 Guwahati, India

- Led AI-powered feature integrations including Databricks Genie-based report generation and in-platform AI summary modules, accelerating insight delivery by 40%.
- Managed Switchfly API integration for global travel redemptions — rolled out to 133 enterprise clients in 37 countries, adding $50K in new revenue and 14% MAU growth.
- Directed Snappy integration, an AI-based branded merchandise store; delivered to 30+ clients, generating $4K in Q1 and record engagement levels.
- Defined product requirements (PRDs), coordinated with design and engineering teams, and ensured on-time releases using Agile frameworks.
- Collaborated with data and AI engineers to deploy an AI-based help assistant, cutting user query response times by 35%.

- INNODATATICS | AI Product Intern (Gen AI) Feb 2024 – May 2024 📍 Remote

- Designed and deployed Pharmabot, an LLM-powered chatbot for pharmaceutical queries using LangChain + PaLM API, achieving 95% accurate classification and 40% faster response.
- Defined conversational logic, optimized prompts, and conducted RAG-based fine-tuning to improve factual accuracy and minimize hallucinations.
- Delivered BRDs and feature documentation that accelerated internal reviews and approvals by 30%.

PROJECTS (AI PRODUCT MANAGEMENT):

- HerbTech Smart Cultivation System (Incubation Program) – *AI Product Manager*

- Built an AI-driven smart farming prototype for irrigation and environment monitoring.
- Used Generative AI tools (ChatGPT, Cursor, Perplexity) to accelerate concept-to-prototype by 60%, projecting 35% water savings and 25% efficiency gains.

- InvestQuest – AI Product Manager & Prototype Developer

- Created an AI-powered investment assistant offering portfolio insights and decision support.
- Defined user flows and dashboard logic; 50% faster MVP build, with 80% user validation on usability and clarity.
