BHARGAV NATH

AI PRODUCT MANAGER | ENTERPRISE AI | B2B SAAS

+91-6000754907 · bhargavnth07@gmail.com · Guwahati, India (Open to Relocate) · LinkedIn | GitHub | Portfolio

SUMMARY

AI product professional with experience shaping enterprise SaaS and AI-enabled workflows from problem discovery to requirements, prototyping, engineering coordination, testing and rollout. Led product direction and delivery of a 0→1 WhatsApp campaign platform and built internal AI-powered knowledge and analytics tools. Combines product judgement, technical fluency across APIs and LLM workflows, and hands-on prototyping to turn operational problems into usable products.

CORE PRODUCT SKILLS

AI Product Management: Product discovery, problem framing, PRDs/BRDs, user stories, acceptance criteria, prioritisation, roadmap support, product metrics, UAT and release planning

LLM & Intelligent Workflows: LLM applications, RAG, LangChain, LangGraph, Hugging Face, prompt design, retrieval workflows, evaluation planning, human-in-the-loop safeguards

Technical Product Delivery: REST APIs, webhooks, OAuth/PKCE, Meta WhatsApp Cloud API, system integrations, data flows, edge cases, technical hand-offs

Tools & Analytics: Jira, Confluence, Figma, Miro, Postman, SQL, Python, Next.js, Supabase, FastAPI, Pandas, Power BI, Tableau

PROFESSIONAL EXPERIENCE

Vantage Circle Feb 2026 – Present

Solutions Engineer I | AI Products & Integrations

- Led product definition and delivery of WhatsApp Campaign Manager, from concept and prototype through engineering coordination, QA and production rollout; shaped template management, campaign setup, audience filtering and delivery-status visibility.
- Defined key platform behaviours and safeguards across Meta WhatsApp integration, including webhook-based status updates, signature verification, STOP opt-outs, retry/idempotency handling and protections against duplicate or unsafe sends.
- Designed and built Solutions Central, an internal knowledge and workflow platform connecting business systems and structured knowledge sources, with searchable project context and an AI-assisted side-panel experience.
- Translated operational needs into requirements, user flows, acceptance criteria and technical hand-offs; partnered with engineering, QA and business stakeholders through iteration and release.

Vantage Circle Feb 2025 – Jan 2026

Associate Project Coordinator

- Coordinated delivery of enterprise SaaS enhancements and third-party integrations across Travel and Merchandise, supporting requirements clarification, API validation, dependency tracking, QA and release readiness.

Innodatatics Feb 2024 – Aug 2024

Generative AI Intern

- Worked on LLM-enabled workflows and retrieval-augmented application concepts, using Python and AI frameworks to structure domain information and prototype user-facing intelligence workflows.

SELECTED AI PRODUCT WORK

WhatsApp Campaign Manager | *0→1 Product Build* — Internal campaign platform integrating Meta WhatsApp Cloud API; defined template, campaign and audience workflows, delivery visibility, webhook handling and operational safeguards.

Solutions Central | *AI Knowledge & Workflow Platform* — Combines structured project knowledge, business-system ingestion, searchable documentation and an AI-assisted browser side panel with source-aware retrieval.

Breakage Intelligence Lab | *AI Analytics Prototype* — Separates deterministic redemption-data analysis from a local LLM interface, using structured analytics and natural-language interaction to explore operational breakage patterns.

EDUCATION & CERTIFICATION

M.Tech, Electronics Design & Technology
Tezpur University | 2023 | CGPA 8.49/10

B.Tech, Electronics & Communication Engg.
Gauhati University | 2020

Data Science & Generative AI
SUNY Potsdam | 2024
